NVivo key terms

☐ **Sources** are your research materials including documents, PDFs, datasets, audio, video, pictures, survey results, etc. Import sources using the **Data** tab.

☐ **Coding** is the process of gathering material by topic or themes. For examples, selecting a paragraph where you participants talk about ‘motivation to learn’ and coding it at a **node** ‘motivation to learn.’ Do coding from the **Analyze** tab.

☐ **Nodes** and **cases** (or case nodes in NVivo 10) are containers for your coding, they let you gather related material in one place so that you can look for emerging patterns or ideas by running a **query**.

☐ Create visualizations of your analysis using the **Explore** tab to create **Diagrams** and **Maps**.
